Not illustrated. 1816 Excerpt: .in one direction, and opaque in the other; is highly electric on being warmed; sometimes the various colours are united in one prism; they are generally im bedded in Granite, Crystal, or Chlorite. Fracture uneven, conchoidal. Green Tourmaline, Emerald qf Brazil. Colour, black green across the prism; is found imbedded in Granite of various dimensions, in three-sided prisms, with and without pyramids. 1 Blue Tourmaline, Sapphire qf Brazil, Indicolite. Colour, black Sapphire blue; occurs with the preceding, and is of the same form. Pink Tourmaline. Colour, intense pink red. This beautiful variety, lately discovered, much resembles the Balais Ruby when polished; some crystals are pink in the centre, blue and green outside; these specimens are extremely rare. The preceding varieties are much esteemed, and worn as ornaments; then termed precious Tourmalines. Hardens equal to Amethyst; takes a fine polish. They are from the royal mines in...
