New Book. Earth's surface is constantly being changed by heat,
water, ice, salt, plants, and animals. Sometimes the changes
are destructive to human activities such as farming and the
building of structures. This interesting title shows the different
ways people try to stop or reduce this change in the land.
Examples feature such structures as dykes to hold back water
and windbreaks, and adding shrubs, grass, and trees to an
area of land to prevent erosion.
