*This pdf is indeed gripping and interesting. It is definitely simplistic but shocks within the 50 percent of your book. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

AUTHORHOUSE, United States, 2012. Paperback. Book Condition: New. 229 x 150 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Few books have been written specifically for those dedicated men and women who labor as caregivers in our healthcare system. This is unusual when one considers that the services provided those needing medical care is largely their responsibility. This book is an educational resource which addresses the multi-faceted and often complex physical, psychological, social and spiritual issues which challenge the caregivers. The information contained in this text will be especially beneficial to these caregivers who provide direct, hands-on care to the elderly residing in special and long-term care facilities as well as home care. It will assist this specific group of caregiver with little or no formal training in the health care profession to participate more realistically in goal setting strategies, increase self-confidence, and improve their decision making skills. It will give them a greater sense of purpose and an improved sense of security in performing their caregiving responsibilities. It will also be helpful to the caregiver in his or her accumulating knowledge about the elderly resident. For example, he or she will become familiar with family structure, stressors which exist, coping skills, social support structures, physical, psychological, psychosocial and spiritual symptomatology as well as ethnic and cultural issues. The author is of the opinion that the information contained in this book will, in addition, increase the caregiver s knowledge base. For example, it will include effective ways of communicating with the elderly for whom they are caring including the use of behavioral management improving the caregiver s skill base making their jobs easier, and more productive. Such knowledge will improve their quality of life as well as the individual resident for whom they are responsible.
